

Path Improvements... Your Opinion Matters!

- ❖ The coastal path around the bay gets muddy and slippery in autumn/winter
- ❖ The idea is to utilise a grass protection mesh to reinforce the path and grassed areas
- ❖ The grass will grow through the mesh, so the visual impact is minimal
- ❖ This will provide a stable, strong and safe surface throughout the year, and will improve access for wheelchairs, buggies, etc.
- ❖ Maintenance free
- ❖ Potential funding is available from “Paths for All”

- ❖ CBAG is seeking local opinions and ask you to complete the form below, ticking either '**For**' or '**Against**'
- ❖ If you have any comments or feedback, or would like further information, please contact, by 14th June; info@cbag.co.uk
- ❖ We will need volunteers to execute this work as well, so please put your name down if you are available to help!
